

YASSINE HAJ HMIDA

Industrial Instrumentation & Maintenance Engineering Student · Embedded · IoT · Robotics · Founder

La Goulette, Tunis, Tunisia · +216 54 861 084 · hajhmidayassine@gmail.com · linkedin.com/in/yassinehajhmida · github.com/yassinehajhmida

Industrial Instrumentation & Maintenance engineering student at INSAT and founder of **Dhawily** — actively seeking a Summer 2026 internship in Instrumentation & Maintenance, embedded systems, IoT, automation, or Industry 4.0, and eager to contribute to a real engineering team from day one. I build end to end, from sensor and circuit to deployed software and finished product, and I'm driven by turning hard technical problems into things that actually ship.

EDUCATION

National Institute of Applied Science and Technology (INSAT) Tunis 2023 – 2028 (Expected)
Engineering Cycle — Industrial Instrumentation & Maintenance Engineering

– Completed the Integrated Preparatory Cycle (Mathematics, Physics, Computer Science); core focus on instrumentation, maintenance, automation, electronics, data acquisition, and embedded systems.

Baccalaureate Highest Honors Pioneer High School of Ariana, Tunis 2023
17.93 / 20 ranked **72nd nationally out of 17,249 candidates** (top 0.5%).

EXPERIENCE & ENTREPRENEURSHIP

Dhawily Founder & Developer 2024 – Present

– Run a digital-manufacturing venture (custom LED neon signs, CNC machining, acrylic engraving) end to end — design, production, marketing, and customers — shipping to real paying clients.
– Building an **AI pipeline that converts text and images into production-ready CNC files**, enforcing real Neon Flex constraints (bend radius, segment continuity, channel width) to cut design time and material waste.

SAME Founder, Apparel Brand 2022 – 2023

– Founded and ran a clothing brand — designed collections, managed production and supply chain, and drove sales and brand recognition.

SELECTED ENGINEERING PROJECTS

Smart Air Quality Monitor IoT & Embedded
ESP32 system that measures air-quality metrics and streams them in real time to a live dashboard. · **Stack:** ESP32 · sensors · Wi-Fi · IoT

Haniny Smart Driving & Insurance App Hackathon · Mobile **Top 4 / 50+ teams**
Mobile app that scores driving risk for usage-based insurance, built under hackathon pressure. · **Stack:** Flutter · risk analysis · UX

Arduino Robotic Arm Robotics & Mechatronics
Multi-axis arm with servo actuation and sensor feedback; built from scratch and featured on national TV. · **Stack:** Arduino · servos · sensors · embedded C

Flood Identification Dashboard Tunisia — Data & Front-End
Interactive dashboard mapping flood-risk zones across Tunisia from geographic and risk data. · **Stack:** data visualization · GIS · front-end

Additional Wino (services marketplace, Flutter) · Wassalni (mobility app).

TECHNICAL SKILLS

Programming C · C++ · Python · JavaScript · TypeScript · Dart / Flutter · HTML / CSS

Embedded & IoT Arduino · ESP32 · microcontrollers · sensor integration · data acquisition · real-time monitoring · IoT systems

Industrial & Manufacturing instrumentation · maintenance · automation · CNC / CAM · CAD · product design

Software & Tools mobile (Flutter) · front-end & dashboards · Photoshop · Illustrator · After Effects · Premiere Pro

HONORS & ACHIEVEMENTS

– Baccalaureate **ranked 72nd nationally / 17,249 candidates** (17.93/20, Highest Honors) — top 0.5%.
– **4th place out of 50+ teams** — JE INSAT Hackathon (Haniny).
– **1st place, National Tunisian Day of Robotics (TUNIROBOTS), INSAT** — autonomous task-completing robot.
